

Clinical Observer Training

Session 4

What's the plan?

Session Objectives

At the end of this session, participant in a research study or formal assessment shall be able to

- summarize the study goals, study questions, and evaluation design; and
- discuss current data-collection plan as it relates to the study goals.

At the end of this session, participant in a general assessment data-collection program shall be able to

- summarize the goals of the assessment program, and
- discuss the current data-collection plan as it relates to the goals of the program.

To Be Determined by Facilitator

Review Handout: Study Plan Overview Template

Responsibilities of a Clinical Observer

To be determined by facilitator from specific proposal, study design, etc.
